

ProTaper Gold®

The geometries of ProTaper® with advanced metallurgy

NOW

The ProTaper® legacy continues with ProTaper Gold®:

- +24% increased flexibility**
- x 2.6 greater resistance to cyclic fatigue***
- Shorter 11mm handle

ProTaper Gold® features the same simplicity and smoothly tapered shapes you know and trust from ProTaper® Universal. Developed with proprietary advanced metallurgy, ProTaper Gold® rotary files offer greater flexibility for ProTaper® performance that's better than ever.

ProTaper Gold®

The same winning technique with **greater flexibility**

Trusted performance and predictable shapes

The ProTaper Gold® technology includes a series of “Shaping” and “Finishing” files that create the predictable ProTaper® shapes, and a system proven and trusted by clinicians throughout the world.

“We all know that shaping significant canal curvatures can be scary. Gold has given me a new level of confidence and control that turns this fear into fun.”

Dr. Jordan C. West, DDS, MSD

Pre Op View

Post Op Perpendicular View

Post Op Distal Oblique View

The proprietary processing of ProTaper Gold® allows it to maintain the canal curvature.¹

Greater flexibility start-to-finish

The visibly advanced metallurgy of ProTaper Gold® creates a difference you can see – and feel. That’s because ProTaper Gold® rotary files feature the same exact geometries as ProTaper® Universal, but offer an increase in flexibility. This is especially important in the finishing files, when navigating challenging curves in the apical region.

ProTaper Gold® shaping files pre-enlarge canals and are designed to be used with the same familiar outstroke brushing technique.

ProTaper Gold® finishing files are more flexible so you can shape and finish each canal with a complete system approach.

Greater resistance to cyclic fatigue

ProTaper Gold® provides more than twice the resistance to cyclic fatigue as ProTaper® Universal.* And that’s an important advantage, because cyclic fatigue is the leading cause of file separation.²

Familiar efficiency

The majority of clinicians* prefer ProTaper Gold® over ProTaper® Universal rotary files because they create the same smoothly tapered shapes as ProTaper® Universal³ while delivering significant new advantages.

You get enhanced flexibility and resistance to cyclic fatigue, with the familiarity of a complete file system you know and trust.

The non-cutting tip design allows each instrument to safely follow the secured portion of the canal while the small flat area on the tip enhances its ability to find its way through soft tissue and debris.⁴

The convex triangular cross-section and progressive taper enhance cutting action while decreasing rotational friction between the blade of the file and dentin.⁵

ProTaper Gold® features a patented, progressively tapered design that has been trusted by dentists for more than ten years.

These variable tapered gutta-percha master cones predictably fit canals shaped with ProTaper Gold® and deliver warm gutta-percha up to 4 mm beyond the heat source. Corresponding paper points and Therafil® for ProTaper Gold® are available.

ProTaper Gold® uses the same rotary action and works with the same motors as ProTaper® Universal.
